PROFILE

Authoritative Lead Software/Web Developer with +10 years heading up successful development teams through agile direction and careful delegation. Willing to direct large-scale teams or work hands-on to complete extremely difficult projects. Brings both cutting-edge programming expertise and exceptional interpersonal skills to leadership roles

EXPERIENCE

Full-Stack Developer

- Managed and maintained several Windows/Linux VPS and servers, ensuring optimal system performance and uptime.
- Implemented and managed backup and disaster recovery plans using Veeam and other backup solutions, ensuring data integrity and quick recovery times.
- Evaluated, designed, implemented and modified databases and database applications.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Set up and controlled user profiles and access levels for each database segment to protect important data.
- Identified issues within databases, performed troubleshooting and implemented effective solutions.
- Designed and maintained streamlined, reusable and reliable code for user within distributed cloud environments.
- Developed and integrated automated testing frameworks to ensure code quality, reduce manual testing effort, and streamline deployment processes.
- Configured and maintained CI/CD pipelines using tools like Jenkins, GitLab CI/CD, and GitHub Actions, enabling faster, reliable, and repeatable software releases.
- Collaborated with development teams to implement continuous integration practices, reducing code conflicts and improving overall code quality through frequent testing and feedback loops.
- Implemented automated build, test, and deployment processes across multiple environments, reducing deployment time and minimizing downtime for critical services.

Statement of Achievement

Maher Saleh Helmy Saleh

has successfully achieved student level credential for completing the JavaScript Essentials 1 course, provided by Cisco Networking Academy in collaboration with OpenEDG JS Institute.

The graduate is able to proficiently:

- Understand the syntax of the core JavaScript language that allows for working with variables, operators, flow control, and functions.
- Understand the basics of the JavaScript data types system, distinguishing between primitive and complex types.
- Think algorithmically and can analyze a problem using a programmatic conceptual apparatus.
- Choose a data type adequate to the problem being solved and use suitable flow control means.
- Design, develop, and improve very simple JavaScript programs.
- Interpret and handle basic exceptions related to errors in program execution.
- Understand a programmer's work in the software development process and the role of fundamental development tools.
- Understand how a program is interpreted and executed in an actual computer environment, local or remote.
